

Securing the Future - True to tradition.

Together with you we always want to be one step ahead. For more than 100 years our market success has been based on traditional values such as quality, technical expertise and reliability as well as innovative ability, high-technology, flexibility and promptness. Our goal is your success.

According to the motto "true to tradition" we take advantage of traditional values, infusing them with new life and aligning them with today's market requirements.

With two locations, an effective area of about 6000m² and available open space of about 20 000m², we have taken the necessary steps to ensure expansion in a sustainable way. In addition, due to the proximity to the Technical University of Brunswick and the University of Applied Sciences Brunswick/Wolfenbüttel, we have access to highly qualified staff. As a specialised company we are also committed to constantly increasing our know-how as well as setting standards for the future by offering intensive training programmes and promotion possibilities for qualified trainees in our own company.
